1. We must accept finite disappointment, but never lose infinite hope.
2. Mercy to the guilty is cruelty to the innocent.

A few weeks back, I went to watch a movie called "Aaaji: The Mountain Man", with my friends.

This movie was about a man, determined to break the mountain on his own, using crude methods like picket and hammer. Many a times he failed, he faced injuries, became weak, had lost almost all of his assets, could not find food to eat and place to sleep.

But even then, he tried and tried and ultimately succeeded to break the mountain completely.

This story made me feel the sense of disappointment and infinite hope, that was imbibed is that person.

Then I put a thought that, even when he could not succeed & failed infinite times, then also ultimately he finally found success. What was behind all this?

This was ultimately Disappointment & hope, A Unique mixture of feelings in ones own mind and soul!

Disappointment means a peculiar feeling inside a person or many ones, that has occurred because of failure to achieve or gain something.

It may come because of various reasons. The prime most ~~import one~~ important one is being ambitious.

There are various factors ~~are~~,  
Internal & external which brings  
light, motivation, ambition, energy,  
aim, desire into one's own mind  
and soul. ~~are~~

And if such things  
fails to achieve or fails to  
contain man's needs and Aspirations,  
then comes the feeling of  
disappointment, as if one is  
one's life.

There multiple Internal  
factors like ~~are~~ one's own  
Inability, incapacity, lack of  
experience and lack of effort required,  
But at the same time there are  
multiple external factors like of  
friends, family, parents, colleagues,  
Teachers, leaders, organizations, Billions  
of people around the world & ultimately

LUCK.

Now one should as another question, why should one accept disappointment?

one should accept Disappointment, to learn and to know that how our actions affect our own lives and others. This helps us to understand, that we ~~were~~ were wrong (from inside) or some one else was wrong and helps one to ~~make~~ make him think that where was we wrong or could not do the right thing.

Now, there are multiple areas and multiple dimensions where disappointment might happen to one own self and to other. These include in society like challenges of caste, racism, gender, urbanization, globalization & communication, weather seasons,

It can also come in economic challenges and ambitions like poverty eradication, employment generation, human development achievement like health, education, skill development, generation of income, various sectors of economy & their development like Agriculture, service, industry etc.

It might also come in various political challenges and disappointment caused by poor functioning of parliament & government, policy paralysis, poor state of schemes, unethical work culture & corruption.

It might also be caused because of our failure to protect environment, resist climate change & ensure conservation of Biodiversity.

Now, we must turn upon the other side, the Bright and side full of light that is HOPE.

hope is a sense, a good feeling inside a person or among many others which signifies that a particular thing might be achieved. A goal might be attained and in future the things would turn up in the way we want them to be.

There are multiple factors which might cause hope in one self. These factors may be internal or external.

Internal factors may be his own conviction, his

own beliefs, his faith, his own philosophy & ideology or his confidence that ~~his~~ competence and hard work will lead him achieve what he desires.

But there might be other external factors like family, friends, colleagues, parents, various ideals related ones own field and vast experience of hundreds & thousands of people, shared on the internet.

One one should ask another initial question, why should one strive for infinite hope?

This is to make a person happy, to ensure a feeling of containment, active success to gain something & to fulfill one's own self commitment.

There are many areas where  
Hope can change a lot. These  
include social change and  
development, economic growth,  
hopes of political aspirations, hopes  
for internal cooperation in  
multiple areas and hope to  
save our mother earth from  
its own destruction.

~~There are many areas where  
hope can change a lot. These  
include social change and  
development, economic growth,  
hopes of political aspirations, hopes  
for internal cooperation in  
multiple areas and hope to  
save our mother earth from  
its own destruction.~~

Here ~~is~~ what  
should be done to ensure  
that feeling of disappointment  
& hope makes a person or  
group to evolve & develop one own  
self?

The answer lies in various areas where a person or group lives and factors that affect them.

This training of mind & soul can take place inside schools, family, support from parents & family, support from various colleagues inside an organization, from neighbours inside a residential area, through various government interventions & schemes & work of NGOs and ultimately through spread of knowledge & exchange of information through various ways.

Hence through implicit or explicit, these feelings helps a society to constantly achieve new levels of development and evolve at next level.
