

ESSAY

Time Allowed: 3 hrs.

Max. Marks: 250

Instructions to Candidate

- Both sections are compulsory.
- Attempt an essay from each section.
- Each essay carries 125 marks.
- Write each essay in about 1000-1200 words.
- After finishing the first essay, attempt the next on a fresh Page.
- Any page left blank in the answer-book must be crossed out clearly.

(Examiner will pay special attention to the candidate's grasp of his/her material, its relevance to the subject chosen, and to his/ her ability to think constructively and to present his/her ideas concisely, logically and effectively).

SECTION - A

1. Success is not the key to happiness; happiness is the key to success.
2. The starting point for all achievement is desire ✓
3. Quality is pride of workmanship.
4. If you know the enemy and know yourself you need not fear the result of a hundred battles.

SECTION - B

1. The illiterate of the future will not be the person who cannot read. It will be the person who does not know how to learn.
2. Wealth is the ability to fully experience life.
3. Men have become the tools of their tools.
4. Since we cannot change reality, let us change the eyes which see reality.

Remarks

h.
 ' Achievers are not losers rather they are losers who rise from their failures '.

Strong will power makes ~~the~~ leaders '.

' Leaders are not born leaders, they are created '.

As we read such philosophical lines we get inspired to achieve something great. We don't know what is great, what is commendable, good. But still want to achieve it. That is what the desire is. The desire is when you have wish to have that, achieve something. As word 'Desire' it self has strong meanings both positive & negative. When there is desire to do good for society, to help needy, to ~~serve~~ serve nation or state that desire is very positive & takes the person towards its goal. When there is bad desire, people loose their mind, they go on doing what they are not suppose do. Human being is social person & has to follow certain rules, abide by the nature laws & if its not done that can hamper the human being. When human being breaks the rules & violate the laws, reason is 'Desire'. So a strong positive desire is something which gives the positivity. When person with full of positivity, dedication & strength starts something, nothing remains difficult for him.

Remarks

good

With the strong desire comes the strong faith on oneself / individual. As everyone knows the magic of faith, Having faith on oneself can create wonders. As ^{Junior} Martin Luther King has said 'Faith is where putting steps when no stairs are visible'. So when one has the strong desire to achieve one's dream, goal, & ambition nobody in the world can deter that person & automatically that person's faith increases on himself & with the confidence 'one can achieve impossible'. As someone has said, 'There is nothing called impossible', rather that is also 'I am possible'. To have such confidence, faith what is important first is to have strong desire towards achieving goal, dream. Once one has confidence on oneself automatically morale goes high. Having high morale i.e. having belief on one's capabilities is very important. One can have the high morale only when one has high belief on oneself. To have belief on your potential & capabilities first one needs to know what you want i.e.

Remarks

Desire ? So it plays very important role in human beings life.

Human being desires/wishes changes with the situations or some strong wishes which will be there always. So there are scenarios where one has a wish & even though that doesn't get fulfilled doesn't matter but few wishes which are very close to your heart and if that doesn't get fulfilled, human gets ~~upset~~ upset, depression might come. In few cases even few people become violent, revolt against the present scenario.

They try to fulfil the wish at any cost & that strong wish makes the person vulnerable towards the bad things.

Great There are many examples where we can say that strong wish has given us Freedom, Constitution, Our great freedom fighters

like Mahatma Gandhi, S.C. Bose, Nehru, Patel had vision, mission. But before that vision or mission it was just desire to have "Swaraj" A state ruled by our own people, Freedom from Imperialism, Colonialism. And all this could happen just because of strong wish of

Remarks

the great freedom fighters. There are some bad examples of Hitler, Mussolini also, just one strong bad desire also can hamper the entire world. Creation of world war II itself is great example. So one need to have positive desire, wish.

There are people who have no desire, or there dreams are of basic needs like food, shelter etc. In African countries or in India also, there is lot of poverty & when people have problems of health, nutrition, water, education they don't think about their goals rather they don't get the opportunities to have desire, to dream. Their focus always remains on fulfilling basic needs. So they never dream of anything. And even if at all they have desire, their desire remain so limited. It's not wide, huge focus remains on small things. They follow what comes on their way. They lead the life the way they are living now or presently. For, their aim, dream ambition remains limited. So to have a strong

Remarks

positive desire what is required is to have a condition, where your necessities are fulfilled & then only if they dream, dreams are small so can't work towards big ambitions. As they don't have big ambitions, they won't work hard, dedicatedly. So automatically they won't be able to success. That is they can't be achievers as they don't have strong, big, dream, ambition. So the poor remains poor & this vicious cycle goes on. Still there have been many examples who have emerged from the poor situations & led the world by examples. So everyone so be it rich, poor, irrespective of caste, class, sex, religion should dream high, keep strong desire.

Vgco

Having only strong desire doesn't make you what you dreamt of. No pain, No gain

Excellent

Nothing comes without Efforts so hardwork, continuous motivation & work towards the goal is important. Achieving is possible only when one works continuously, dedicatedly towards it. As ~~our~~ example we can take Dhirubhai Ambani where he continued his dream

Remarks

Excellent aspect / Dimension.
Need more explanation + Dimension

passionately. Never give up, or Perservance towards something takes individual towards success. Michael Phelps & Bolt, are the people who are leading the world. Breaking their own records, setting the new benchmark for future generations to come & all this is happening just because of their wish & desire to be there, to achieve that. As swami Vivekananda has said: Rise, Awake & stop not till the goal is reached.

This aspect is about essay head write explanation

When we talk about the positive desires think about what bad/negative desire can create. The world is currently suffering from few crises & the one biggest among is the Terrorism. Terrorism can damage the entire world, destroy the world completely also. If not taken care properly. Why it has gone to such a extent? Terrorism spreading across different countries easily is because people are getting misled. Misleading of a person is possible only when that person has no idea of what is good & bad, what is right & wrong.

Remarks

what is moral & immoral, what is ethical & unethical. The vulnerable people getting targeted because its very easy to divert them, influence them & change their priorities, wishes & desires. This is what happening around the countries like Middle East, West Asia, Yemen, Syria. One their desire changes, diverted, with the goal of ~~damaging~~ people can damage the entire world. So focussing on people nourishment of thoughts, is important. So be it by spirituality, ~~scientism~~, knowledge or awareness about what is right & wrong, good & bad is very important. One can never be mislead if his bases is strong. If the person is ethical & believes on integrity & values which are good its difficult to target such people.

In the past also, there are so many cases have happened where the strong wish has damaged the human completely. The creation of different wars so be it Vietnam, Suez canal crisis, American Revolution, British Imperialism on African or Asian countries. The wish was to achieve more money & power through

Remarks

different sources ~~make~~ Britain powerful & that led to crisis, different wars & people suffered a lot. So with the strong desire there can be achievement also & failure also.

As Swami Vivekananda has said, 'Service to God is service to Nation', & Mahatma

Gandhi has said, 'Humanity is important & can never end. If few drops in the ocean are dirty then ocean does not become dirty',

Same way there are people with the bad desire it's easy to tackle them if we have strong desire. Because the 'good' is always stronger, sustainable, reliable than bad.

Spreading the roses is important. 'To fight against bad one does not become bad' &

Having strong desire will take the human or every individual achieve ^{what} he/she aspires of. So Dream high. As our President A.P.J. Abdul Kalam always used to say 'Dreams are those which does not let you sleep'. So work hard, continuously towards achieving your own goal, dream.

Remarks

Failures might come but never give up & those never give up attitude takes a person to the success. Because those who give up they had already almost won the race but the last minute patience & pro that their, that gives the failure. So for not giving till the last movement or rather goal is reached what is important is to keep your desire awake let it be fired always because fire will remain only when there is fuel, ground & spark is their. So continue & dreaming high, aspire big & achieve high radders of success.

68
May

- Excellent
- good grasp of subject
- simple and effective communication.
- only ~~that~~ ^{one} remark for this essay as it is very well written

↓
- There is important aspect about Bridging Bridging the gap between success — achieve.
- you have mentioned it - but could have been much better

Remarks

2] The illiterate of the person is not the person who can't read is the person who doesn't know how to learn

स्कूल चलते हैं। इसके परवाजे से दुनिया राज चलते हैं। कोई आगे चलता है, कोई पीछे चलता है। इससे हमको जीने की वजह मिलती जाती है।
सूरज सा बसके हम। बादल सा बरसे हम।

The school, education has played important role in human beings life since Ancient Era. So be it 'Vedic Age, Gupta Age, Medieval or Modern' Age. In the vedic Age, though was limited to Brahmins, afterwards our system evolved & today Every individual is able to take education free of cost. Education has become the necessity of today's generation,

Our literacy rate has increased. Some states have become literate states. But achieving higher literacy rate does it give us the good education, or education system means just one able to read or write or it is beyond that. To educate someone doesn't mean the person is able to read or write

Remarks

rather Educating a mind what is good, bad ? ethical, unethical, moral, immoral. Developing a human body to sound human mind who is able to distinguish between all of this.

Society has played greater role in developing today's generation. Geographically different locations, different set of people from all across the world are interconnected & stay in contact with each other. Science has played very important role in all of this. All this has happened with the 'Technology Evolution'. A world where people in forest used to live on animals & the world now where everything has to be hygienic, nutritious. With the evolution changes have occurred drastically & that itself shows that even our 'education system needs evolution'

Our focus has always remained on the static part, so be it history, geography or other language subjects. Indian education system has not evolved with time the focus has not been given on different skills, abilities. & that can cause a very big problem for every individual.

Remarks

Your capability, your attitude, your potential to adopt things is very important. If one is not educated, but has very good attitude can easily survive in the world. Rather the education system which just teaches you what is good & bad is not at all important. focussing on theoretical knowledge & not giving the good exposure for different real world situations can't make the person literate. Though having degree is important, but only degree with the person ~~not~~ having any morals, values, ethics can never lead a good & happy life. To have a life which is stable, certainty one has to have focus on different other skills. Our education system is also evolving with time. Rather it has in the process of adoption of 'Good Education system'.

In our constitution, we have liberty, fraternity, integrity, secularism. We talk of equality of social, economic & political. But are these values achieved? Still there is no economic & political social equality because

Remarks

There is no awareness, there are no skills who will tell us. As individual is not aware about its own fundamental rights he will never claim for it. Same applies to the person also, if one will not know only how to learn things? How to achieve the targets. If one will not have the skills required for it, one will never work on it. So to be successful or literate one needs to gain knowledge is important.

In the present world where there is Science Technology evolution has reached to such extent, where individual can connect to each other within seconds, one need to aware about the current happenings around, how Globalization impacting our life. Because of Globalization, Science, Technology evolution, now countries are not competing rather co-operating with each other. (Co-operation) plays a important role in today's world so be it education, environment, health, Tele-communication & Information Technology or space. Interdependancy is always going to be there in future

Remarks

generations to come. Social development along with different new problems which are difficult to tackle are emerging e.g. environment crisis, inclusive growth, parity, terrorism. And all these requires co-operation, integration. The people who work together, adapt & evolve with the situation, are only going to survive in future generations to come.

‘Knowledge is Important’, but Ignorance is shame. If one is not aware of the situation that is not blame but ignoring what is important is shame. In today's competitive world, where every will be computerised, our performance will be directly linked to the work, so no avoidance of work or influencing the manager is ~~not~~ ~~withfully~~ advisable. As in the situations, where ‘Perform & Pay’ are interlinked human can't really survive, without work. One need to actually finish the task assigned to him within the timeline & then only he will be paid. So thinking & finding way to avoid & ignore the work is not.

Remarks

going to make one successful. One has to work dedicatedly for getting paid. So these changes are required & must to bring accountability to our newer generations.

Important point here is, ~~if~~ one doesn't know, any thing which is important, can be learnt! Yes. There are techniques, tools & trainings available across the organizations which train the people. Development of an employce or any individual human being has become very easy nowadays. Through social media, Internet one can easily learn such skills. There requirement is a strong willpower, the ability to learn in any situation without giving up. Because for learning, the important factors are your dedication, hardwork, perseverance & attitude. If one has the strong will can learn anything in the world. There are many great examples in the past who has emerged as successful leader, businessman, politician, industrialist, CEOs with great difficulties. - Abraham Lincoln, Nelson Mandela, Steve Jobs, Mark Zuckerberg can be the great example

Remarks

because though he was college dropped out
 could start billion net worth company &
 sustaining it on his own. According to him
 'What is important is the skill & as we
 all know skill can be developed, learnt
 provided one has the strong willpower
 Azim Premchand Ji, ~~But to~~ Dhirubhai Ambani
 could create the Empire only with the
 'Aspiration & Dedication'.

Margaret Thatcher says view is 'for her
 its not important that how difficult or hard
 the world is, it gives her the courage to fight
 at any cost.' For swami Vivekanand. it is
 like he makes his mind so strong that
 can fight with any problem, situation &
 conquer it successfully. So if one is
 courageous enough to learn, to take risk,
 to climb & fall no one in the world can
 stop him from achieving what he wants
 to achieve. So the illiteracy is something
 when one not ready to loose, to learn or
 to give up for good, better in the life &
 when one will understand the importance

Remarks

of this definition of Illiterate & Literate will change. In Indian education system or generally also, person is considered as literate if he has degree but according to me what is the use of that degree if one is not ethical, moral & lives the life for his own greed rather than nation. The person who lives for himself, gets indulged into corrupt practises can never be Literate rather he is the most Illiterate person. Because knowledge of what is good & bad, still he is doing bad, spreading uncertainty in the society. So instead of having Literates with big big degrees people with good values, ethics, high morals, strong willpower, dedication, confidence & morale are required. If one is with such qualities, no education also can make him successful. The attitude towards things matters not the Literate person degrees. As Mahatma Gandhi has said: 'More one Greed, more need' & 'Absolute power corrupts'.

Remarks

The person absolutely ? So focus on
Skills, Ethics, Values & ~~Learn~~, Grow & Prosper

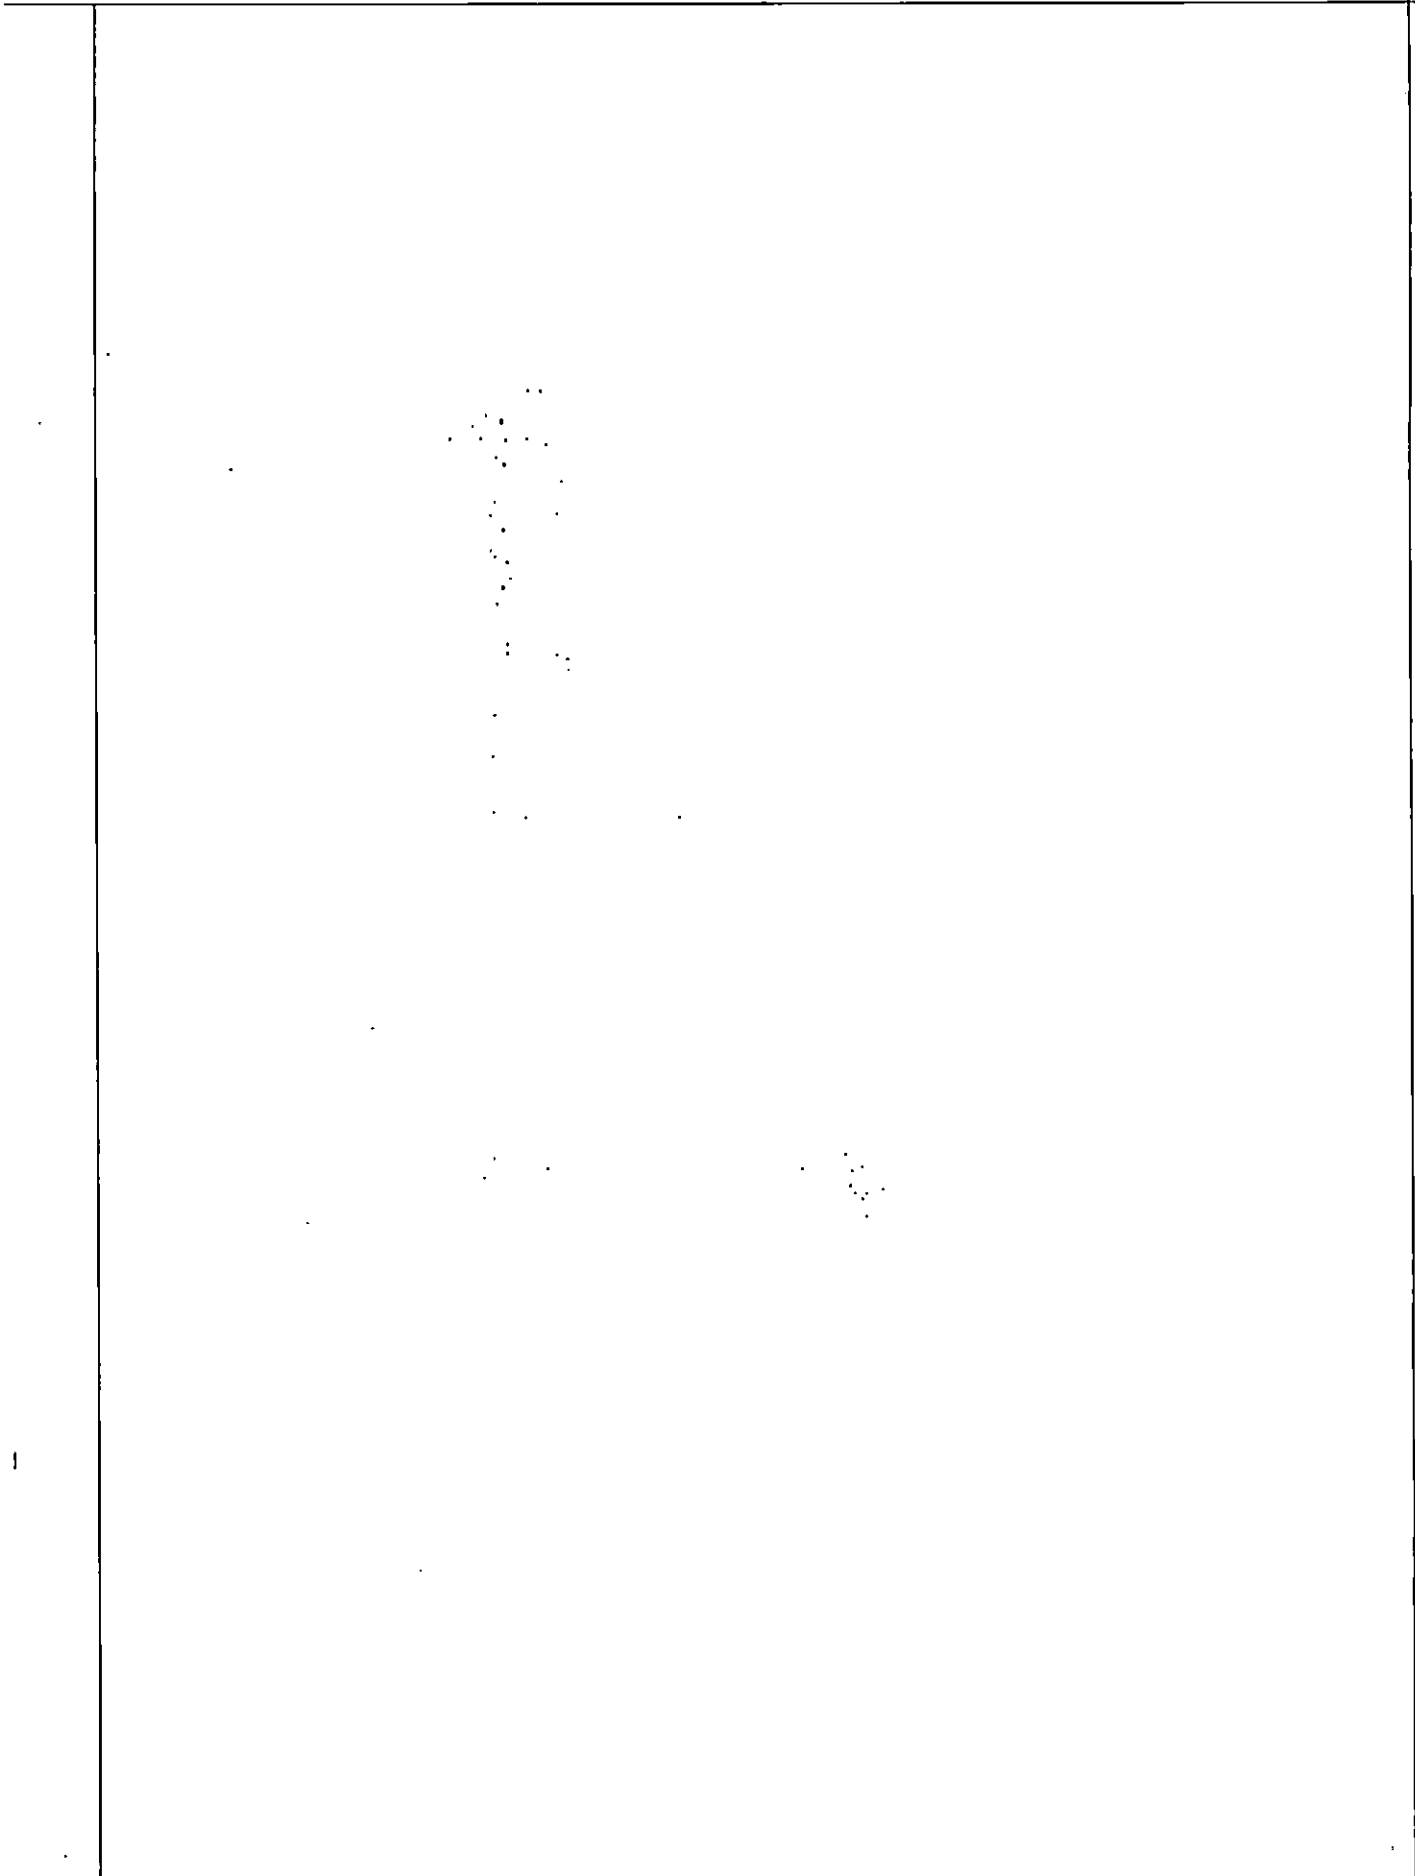

Grow.
