SECTION - A

1. Health is not valued till sickness comes.
2. Everything is funny, as long as it is happening to somebody else.
3. Where words fail, music speaks.
4. Mistakes are always forgivable, if one has the courage to admit them.

SECTION - B

1. The question isn't who is going to let me, it's who is going to stop me.
2. Achieving life is not the equivalent of avoiding death.
3. The ladder of success is best climbed by stepping on the rungs of opportunity.
4. Never interrupt your enemy when he is making a mistake.

Remarks

Section - A

"Health is not valued till sickness comes"

Human being is a beautiful creation by God or nature whose state of health is dependent upon the surrounding like society, political nature of country, environment, mental peacefulness, economy, security of nation etc. If any one of the component are not cared properly it may affect their day-to-day activities ultimately the state of health of mind. Hence the health is ~~at~~ above is only valued when we feel pain due to their fall. Further in essay there would be description about how important is the health before sickness comes?

From Ancient period to till the Mughal invasion, Indian society was united and having "Vasudhaiva Kutumbam" concept. But with Mughal and British

Remarks

Good start

invasion whole society has been destroyed by "Divide and Rule" Policy. The self sufficient Hindustan became Colonial, where Poverty, illiteracy, Female ~~not~~ replaced the well being societies. Only after that only we realized the importance of being independence.

During 1900's, the Policy of Aggression made the Japan and Germany more powerful, which led to World War-I and World War-II. Similarly realization of importance of nuclear weapon, only after the attack over Japan's Hiroshima and Nagasaki. ~~Here~~ This divided the whole world into two sections of nuclear haves and have's not. Hence these importance is only valued after the devastating effect over people.

After the independence India was guided by Poverty, Unemployment, illiteracy as well as food insecurity / shortage. India was dependent upon USA PL-480 Programme for food supply. But only

Remarks

after the conditional supply of USA's food
grain supply which led to ship to mouth
 condition in India, India born the
 seed of green revolution. Hence the
self sufficient in food only valued
 after hickness from PL-480 programme

Economically, India was
 guided by socialism where majority of
industry was heavily the large stake of
government. Also license raj, over regulation,
inspector raj, low FDI entry led
 to "socialism with restricted entry" type
 of situation in India. But After in
 1980's period India faced the balance
of payment crisis which forced to open the
door for world. Even though at that
time it was opposed politically and
socially but ultimately it showed
good result with higher economic
growth, good employment and high
forex reserves. Hence the value
of liberalization only realized by
facing back of Balance of payment
Crisis.

Remarks

Similarly, Indian majority population was devoid of bank account, digital connectivity, good infrastructural facilities, opportunities to start new business etc. But the many problem like Red tapism, Corruption, slower growth of rural area, high inequality in society led to many of innovative and transformational programme like PM Jan Dhan Yojna, Direct benefit transfer, Start up India, Digital India etc. These ~~great~~ great programme only initiated after the suffering from sickness of benzene bundle and Corruption. Even though politics is not untouched from it.

Politically, Indian democracy is celebrated everywhere for being providing freedom, liberty, socio-economic justice, equality etc. But due many hurdles the developmental pattern was baised to middle class or upper middle class like lack of devolution of leadership at local level, very less participation of women from SC/ST, and OBC, lack of control of decision making power.

Remarks

Good Start but your 105% full track

These all led to 73rd and 74th Constitutional amendment which provided political and socially empowerment to people. Also the value of ~~emergency~~ democracy strengthened only after the event of "Emergency" which called as Black Era of Indian politics. Hence the importance of democracy only valued ~~when~~ ill sickness comes.

In Science and Technology, India risen to new height in world in current period. But earlier we were dependent upon other country and their organisation for service like GPS, GIS, Defense equipment, biotechnological tool etc. But when the world started worrying about data security of country and information safety of their critical infrastructure, indigenization of these technology started. India develop its own GPS system of "NavIC". Also taking initiative to preserve its traditional knowledge through traditional knowledge digital library. After being patented many of its product by

Remarks

Repeat!

Many country. Hence the importance of indigenous technology comes only after Sickness due to Data theft and use of Indian Product by Patenting them.

Security side, only after Mumbai attack in 2008 we formed the NSH team. It shows our lack of seriousness toward Coastal security as well as preparedness to tackle terrorism. However Un attack also expose our weakness to army base camp. Hence there is need to strengthen our security system with modern state of art technology. The attack over our territory, Army camp, Bomb attack over city only reminding the importance of use of modern technology.

In field of Agriculture, India is self sufficient and exporting food to other country. But the land of our green revolution Punjab and Haryana

Remarks

Suffering from the water stress, soil infertility due to heavy use of fertilizer and extraction of excessive ground water. The decrease in production and productivity only expose to use the traditional water storage structure, soil health card, Agri-business clinic, precision farming etc.

Geographically, our whole country is having great diversity. In which the maximum aligned state for maximum country development were North East of India. These states were neglected in many decades, but their importance only ~~start~~ came to know after demand of organic product, Act-East policy and to maintain good relation by keeping in view of 'Doctrine of Himalayan Rimland.' Now

the ~~firm~~ has become 1st organic state of country and development in these states took new height only when need of these arises. Hence the health of it was valued till sickness comes

Remarks

Internationally, many events only happened when the pressure over Government from society and international organizations created. Till 9/11 attack over USA, Taliban was destroying the Afghanistan and their effect were on all over the world. But the sickness over USA overturned it from Afghanistan.

Similarly, the drowning of a child in mediterranean sea led to rise the issue of migration and refugee in whole world. Also a student protest in Tunisia took form of Arab revolution.

Conclusively, the all above events prove ~~at~~ our attitudinal ideology of wait and watch till it happens to us. Still the many problems (are there in) freedom of women, children, health, education and e-governance which could be solved if effectively identified and properly implemented.

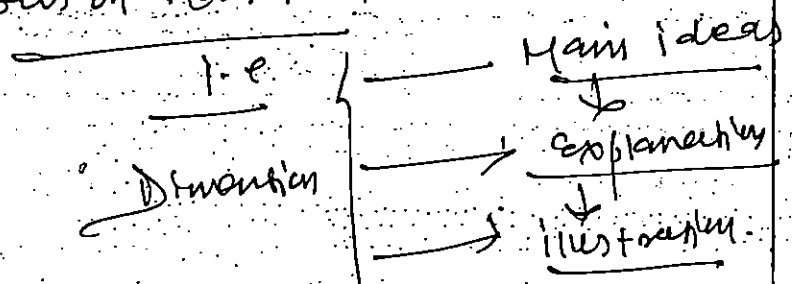

Remarks

With the help of civil society like NRO / SHK / Cooperatives. There is need to create awareness among the people about their right of freedom, equality, democracy and socio-economic justice so that prevalent problems could be overthrown. Also there is need to maintain the unity, integrity and secularism of country while enjoying the right which are basic feature of our Constitution. This will help to Value the health before sickness comes.

- ① Excess use of example is overshadowing main idea
- ② Essay is not just compilation of idea

↓
Explanation - discussion - examination
are input to complete an essay.

- ③ Focus on Main Idea

- ④ Paragraph is

not good - paragraph in essay is like a mini essay in itself.

Remarks

50 marks

Section - B

'The ladder of success is best climbed
by stepping on the rungs of opportunity'

Success is betterly defined as
fulfillment of Aim or achievement of
opportunity provided. Our national struggle
was successful with achievement of Independence.
But this Independence was not come
overnight but it is the struggle of
Century or decades by our national heroes.
~~Many~~ nation in the world got independence
and initial step by step by taking
benefit of opportunity. Example. Germany
and Italy unification, American and
France revolution etc. including India.
These small opportunities in the field
of Society, economy, Politics, Science
& Technology, Security, Agriculture and
ethical value would help to
climb over the ladder of success.

Remarks

Educationally, Majority of our population was illiterate after the independence. But due to various government step like old age education, Jana Shiksha Abhiyan, Promotion of women education etc. that today our 74% of population are literate in short span of few decades.

However we could not achieve full literacy due to our socio-economic factor. Today the massive open online courses, vocational courses, Right to education along with entry of foreign higher educational university taking India into higher level of world stage. This skilled educated youth will be the real demographic dividend for economic growth.

Our Economy was agrarian with very less service and industry setup. But with achieving the goal aim step by step, today India became the most highest economic growth country. Our service

Remarks

Sector since to whole world with quality and at affordable price. IT revolution revolutionize our whole society that make ~~India~~ the ~~most~~ one of top country in field of mobile user, internet user etc. After liberalization India opened the gate of opportunity to ~~see~~ rise to the higher level of economic growth.

Liberalization, provided the opportunity to use latest modern technology of world class to increase the efficiency and quality of our product. This would help to ~~also~~ increase our export share in world simultaneously will provide higher employment opportunity.

In the field of science and technology, India reach at top level from the bottom of ladder. This happens only because of our great scientist and political will to make India the global superpower in the field of science. Today, with the successes

Remarks

launch of Mass orbiter Mission (MOM),
Astrosat, Development of own GPS
 system NavIC, ~~at~~ nuclear capable
 Missile (Agni series) etc., India become
 the youngest of 70th country to do so
 globally. Still ~~we~~ we are stepping
up on the runway of opportunity to reach
ladder of success through various
 scheme like Atal Innovation Mission,
ISRO, DRDO etc.

Pattern of development of Agriculture has change the
 more than 50% GDP was from Agriculture
 during independence, now it reduced to
 15%. The extra labour is utilized in
 MNREHA, industry and real estate
 construction. Our production has raised
 from 50 Mt. to 262 Mt which is
 remarkable progress along with increasing
 productivity to many fold. However, still
 the problem like soil infertility, water
stress, excessive fertilizer use, low
productivity prevail but with use of
 opportunity like precision farming, e-technology
Food processing industry etc India
 will reach to ladder of success.

Remarks

In the field of Governance, RTI bring revolution which has empowered the efficiency in administration and increase the transparency and accountability by reducing the corruption. Many e-portal in the field of health, education, women & children safety, security etc. helped to reduce the human interface and increase efficiency of work. Many project like Digital India Mission, start up India, Uyendoot, Lokum, e-shoome project, MMP etc. would help to improve governance of country by fulfilling the aim of minimum government - Maximum Governance.

Politically, After the independence our leader chosen the national political structure with democracy and republican even majority of our population were illiterate and unaware. But with time due to Constitutional amendment, Judiciary Judgement, the legislation our political structure become most power with largest democracy in country. Many reform like 73rd & 74th

Remarks

Constitutional amendment, Reservation of women in Panchayat, strengthening Electoral Commission etc. led to higher confidence of people in National Democracy. Our democratic structure along with Constitution helped to maintain Unity, integrity and sovereignty of India.

Our Societal Conditions were initially not so strong in field of women education, high IMR & MMR, early child marriage, Patriarchal society etc. But with time there had been improvement in all field. India achieved most of target of MDGs and is now fully committed to achieve Sustainable development goal (SDGs). Still social abuse like dowry, rape, Murder etc. happening in day to day society but with good political will and smart effort of our policy and smart citizen will bring it down to step up as a leader of success.

Remarks

Ethical Value give us strength to do work with compassion, empathy, with honesty and integrity. For the sustainable development of society Value in person are most required. These Value inculcate from the family and society which are base of ladder of success. Hence there is need to promote Value Education, Business and Corporate Value even by keeping in the view of environment

necessary for Environment Protection - it's sustainable development of Country. As our father of nation rightly said " We have enough to fulfill once need but not greed. Many revolution like Chipko Movement, Narmada Bachao Andolan etc raised with the help of Civil Society to protect our own Nature. So that our future generation too get benefit of Nature to reach the ladder of Success by stepping on ring of Opportunity.

Remarks

Conclusively, for sustainable growth or success of individuals and institute depends upon effective utilization of opportunity provided then ~~than~~ ~~only~~. There should be fulfilment of goal aim with value to reach at ladder of success. As ~~the~~ ^{there is need to} effort to rise in excellence of individual and collective responsibility than only nation would constantly rise to higher level of endeavour which is enriched in fundamental duty of our constitution. This will greatly help to climb on ladder of success with stepping on run of opportunity.
