Programme Approach

- ▶ Current Affairs for IAS is an area which is by far the most important aspect of the GS paper- 1 and also perhaps the most difficult area to master. Important, because good number of questions, whether they are in the prelims, draw their inspiration from what is happening in the contemporary context, and difficult, because of its vastness and difficulty in identifying what is important and what is not.
- ▶ Also in the process of current affairs' preparation, most crucial is the listing of topics and ability to comprehend the facts that could be possible there in the given choices.
- ▶ Our approach is to cover **400+ topics through classroom session and study material support. It is an integration of concepts and range of information**, as the combination of both is crucial for Prelims examination in the changing scenario. We will also cover Economic Survey, India Year Book and Budget 2017-18 along with current affairs tests in this programme.
