Roll No. _____

ESSAY

Time Allowed: 3 hrs.

Max. Marks: 250

Instructions to Candidate

- Both sections are compulsory.
- Attempt one essay from each section.
- Each essay carries 125 marks.
- Write each essay in about 1000-1200 words.
- After finishing the first essay, attempt the next on a fresh Page.
- Any page left blank in the answer-book must be crossed out clearly.

(Examiner will pay special attention to the candidate's grasp of his/her material, its relevance to the subject chosen, and to his/her ability to think constructively and to present his/her ideas concisely, logically and effectively).

Remarks

Strength: You have the better language skills. You can convey the matter in a better way.

Weakness: From the essays it is evident that you do not read news paper editorials at all. You are not collecting even material from the Newspapers for h.s. purposes. If you do both then your essays will be of good nature. There is no doubt in that.

Suggestions: As above

AK
 Discees with me

SECTION - A

1. Many men go fishing all of their lives without knowing that it is not fish they are after.
2. The material world is simply an expression of the mind.
3. The higher we are placed, the more humbly we should walk.
4. Sports and Competition do not build character; they reveal it.

SECTION - B

1. Consumerism kills culture with overproduction and heightened sense of need, established by the marketing.
2. In the era of post truth fact depends entirely on the power of man who can fabricate it.
3. People 'over-produce' pollution because they are not paying for the costs of dealing with it.
4. There are not enough jails, not enough police, not enough courts to enforce a law not supported by the people.

The material world is simply an expression of the mind

"Ek din ^{mit} ~~me~~ jayega, maati ke mol
Jag mein reh jayenge, pyaare tere bel"

These lines from the famous ~~Rag~~ movie Dharam Karam which means that one day we will get annihilate ~~and only our~~ deeds will remain in this world. It describes perfectly the philosophy of human life.

All 4 in case of ...
 and ...
 have so much at glance towards material world? Why we consider this material world as the sole purpose of life? Is it only mind behind all this? or other factors are also there. We will discuss in this essay but before that let's understand what material world is.

Material world is the world which has its genesis ~~is~~ because of human needs. Human basic needs of eat, sleep, mate and defend has created this material world which is much improved and sophisticated version of natural world, which nature has bestowed upon us. Material world is not necessarily tangible, it can be intangible also eg various concepts like nation, state, caste etc are part

Remarks

... the spiritual world. Spiritual world is not restricted to salvation of one's soul. It also comprises a world where feelings and values of humanity; i.e. humanism are paramount. It is the world where humans are ends among themselves and not just means.

Ideally spiritual world is desirable but there are some benefits of material world also. Material world ensures that needs of the humans are fulfilled. Human needs have evolved from the basic four needs to diverse ones. Thus material world has also evolved if we from ancient to present times.

Now let us see how this material world is expression of mind. Human being are one of the unique creature in which their brain or thinking ability dominates over their body. It is our brain which makes us realise about various pain and pleasures.

In Introduction part is not well connected to the core issues of the essay -

Remarks

have been done so far are at the crest of our mind any other way. I need many things. Let's analyse this by some examples.

Institution of caste was, which is an important component of the world is created by our mind only. It didn't exist. It was created by mind for creation of hierarchy among humans. Mind may satisfy its desire of superiority.

Similarly in tangible domain various creations have been done because of mind. Expensive clothes, cars, house etc are all need of mind. Conspicuous consumption that we see today is totally expression of mind.

Religion whose main purpose was to become a bridge between human and spirituality has become element of material world. The reason is mind which has misconstrued religion as blind allegiance to certain symbols. This not only created friction and strain in the

Remarks

money but we are impressed and we want to earn more and more, so that they can donate more in temple and mosques.

Likewise thirst of political power, ~~also~~ becoming rich are all expression of mind. It is the human mind that created nation and states which are deriving the whole movement of the world has been only one nation, i.e. humanity as also mentioned by Rabindranath Tagore.

This material world which is created due to mind has created a lot of problems which otherwise should not have happened. Materialism has caused exploitation of human by human - child labours, bonded labours, prostitution, etc. are its consequences. Capitalism has caused economic depression which is causing glaring inequality. Thus this can be threatening existence of human only.

Remarks

A human mind like will, language, customs, religion etc. are so much divided that we choose ~~that~~ to ignore the most common factor among ourselves that is humanity.

Material world has also damaged other spheres of our life. Environment is facing challenge because "our mind's priority is self gratification of needs rather than of needs of human race. Technology which was devised for helping human may soon displace human beings because of artificial intelligence."

Therefore, we need to tame our mind. Mind should function in such way that things that are needed for the survival of humans, should only be desired.

Rational thinking should be developed so that current trend of running behind material world should be stopped. Good

Remarks

and ethical education should be imparted to the children so that their mind is trained desirable. This will result they will ^{then} not run behind achieving petty goals of material world like good marks, job. Then they will look for a purpose in life which is in sync with the

Ethicality and rationality should also be promoted in the public sphere through debate, discussion. Mind of people will get trained and they will no more get divided among themselves on basis of caste, class and religion etc. - Corruption in the society will decrease, social justice will be there and Saturdays will become reality.

Mind is like wild very notorious, taming it is not easy. As Kabir has famously said:
 Mala ferat jug bhayi, fira na marka fer
 korha marka dahi de, man ka marka fir.

that even if:

Thus we ~~cannot~~ emphasize more
 on values of satisfaction and content.

This will bring stability in our mind
 and it will not look material end as the
 ultimate goal and end purpose of our
 life. rather it will see achieving
 humanity as the sole purpose of life
 and act according to ~~human~~ ^{will}
 whole human race.)

Totally out of
 Focus.

Section 1

People who produce pollution
they are paying for the costs of
dealing with it.

Pollution has emerged as the biggest
concern of humanity in this 21st century.
Air pollution in the form of global
warming has the potential of eliminating
all forms of life on earth. Similarly,
water and soil pollution is causing
daily problem to billions of people daily
because of lack of portable water and absence
of suitable land for agriculture. Despite this
we as a human race are not equally
concerned by pollution.

The reason for this dichotomy lies in
the fact that all of us are not equally
affected by the pollution and hence are
differentiated seriousness. That is the reason
many of us contribute actively towards

POTABLE

Remarks

analysing various parts of this topic
lets see why people are in
the pollution.

The first reason is increasing consumerism and materialism. Generally a person having good amount of money don't want to live a simple life. Values of consumerism and materialism consumption have so much deeply percolated down among us we want to spend a lot. This is the reason for increasing purchase of SUVs, higher capacity engine cars (which pollute a lot) car pooling is not much appreciated because everyone wants to have his own personal vehicle. Similar thing is visible when people spend a lot on watches on daily.

The other reason is ignorance. People often don't know that their long term consequences of their actions. Farmers often utilise water in the field. Over use of fertiliser happens because of their ignorance. They don't realise that after 10 years they are the one paying for it.

OK
Introduction

Remarks

Reason ^{absence of any government} ~~Reason~~ ^{of} burning of ~~vegetation~~ by farmers is done because they do not have enough resources to transport it. INDIA ~~in~~ ⁱⁿ India also don't have enough resources to install emission controller or catalytic converter.

Nowadays due to falling human and ethical values people have become indifference to the ~~environment~~ ^{environment} during festival and marriage function which affects older people. But lack of compassion of organizers towards them causes a lot of noise pollution.

not important

Since environment is the common resource, tragedy of common happens. Some other has to pay for other's act. Developing and coastal countries are paying for the pollution created by developed countries. According to a report by centre for science and environment everyday around 400 people die in to downstream

Remarks

of municipal effluents by Delhi
municipal corporation. Clearly people of
Aggra, Mathura, Haryana are paying for
acts of people of Delhi.

Generally, economically better off section
has better resilience for fighting pollution
because they can deploy economic resources
like AC, RO-filters etc. but
suffer. Had they been paying equally
for this dealing with pollution they also
would have found their ways.

Generally, it is the government that
pays for dealing with people. Eg union
government imposed coal cess for decreasing
air pollution. But this resulted into costlier
electricity for all and not only for those
who do pollution more. Thus they are
not disincentivised to change their ways.

Remarks

If people in West ~~and~~ were coming
 etc. then they would have cooperated
 fully. USA withdrawal from Iraq etc
reflects the fact that they don't feel threatened
from climate change as other countries
do.

... effect on people has
 aggravated social disparity and class
 conflict. Poor women have to travel kilo-
 metres for search of portable water, cheap
 firewood. Climate related violence has
also increased in the form of competition
for clean water, land etc. Similarly the
 wedge between developed and developing
 country is also increasing because countries
 like India have to spend considerable
 amount of resources on portable water,
 reconstruction and rehabilitation ^{after} of disaster
 like cyclones, which have increased after climate
 change.

Remarks

Thus, if we have to implement the principle in the form of common but differentiated responsibility at international level, we need to think of a system of also.

There should be differential cost of petrol and diesel according to the vehicle size. The price should be such that it discourages big cars. Supreme court has already taken initiative by banning registration of diesel cars above 2000cc.

Similarly, heavy fine should be imposed on burning of crop residue, overutilisation of ground water and discharge of waste into water bodies. Poor and rich both should be penalised heavily. Alternative options and support should be given to MME industry so that they can upgrade their system.

Remarks

Apart from legal provisions, awareness
 generation should be there so that people
 become sensitised towards problem of
 society at large. Rising of moral fibre
 of society will ensure that a rich
 will think about poor before doing
 any act causing pollution. People will
 not burn car pooling, they will refrain
 from burning crackers on auspicious
 days before throwing garbage in open.

Thus this 'over-production' of pollution
 will stop and minimal pollution will happen
 which will be well within the limits of
 carrying capacity of nature.

We all have realise that pollution is
 common problem which needs to be addressed.
 Though in short term it is affecting one section
 of society more, but in the longer run, it
 will become a mammoth monster, that it will
 engulf the whole humanity race.

Remarks

we should not forget that

Nature protects when it is protected

If we all work together as a team then we can prevent human race from getting extinct. Thankfully awareness about environment is growing every day. We should cooperate with each other. We should not delay because we may delay but the time will not.

You are no
long near the control theme.
By taking the road like pollution
and by using superficial things will not
